

South 200th Link Extension

Construction Alert

May 9, 2016

Temporary closure of S 200th Street in SeaTac between Des Moines Memorial Drive and 26th Avenue S begins in June

Sound Transit is restoring area roads in preparation for opening the Angle Lake Station in fall 2016. Sound Transit crews will be building a new culvert over Des Moines Creek along S 200th Street beginning as early as Wednesday, June 1. S 200th Street will be closed to thru traffic between Des Moines Memorial Drive and SR 99/International Boulevard to perform this work. Local access will be provided east and west of the creek.

A full road closure is needed to get the work completed in a safe and efficient manner. This work is expected to take approximately two months to complete. The recommended detour route is described below.

Recommended detour:

Eastbound:

Des Moines Memorial Drive to S 188th Street
to SR 99/International Boulevard

Westbound:

SR 99/International Boulevard to S 188th
Street to Des Moines Memorial Drive

Getting around:

- Detour signs will be posted to get motorists and pedestrians safely around the construction work zone. Watch for electronic variable message signs for the latest driver information.
- Local access only between Des Moines Memorial Drive and Des Moines Creek (west side of creek) and between SR 99/International Boulevard and Des Moines Creek (east side of creek). Motorists will not be able to cross over the creek during this work.
- **Des Moines Creek Trail Access** - Access to the Des Moines Creek Trail will remain open. Motorists should enter from the west on S 200th Street to access the trailhead parking lot.
- Expect motorist delays on S 200th Street, SR 99/International Boulevard, and Des Moines Memorial Drive with increased delays during weekday commuting hours.
- One-way motorist access along S 200th Street may occur in this area before and following the full roadway closure. Flaggers will be onsite to support motorists.

Expect noise from equipment digging up existing sections of roadway and other activities (trucks, excavators, bulldozers, vector trucks, drill rigs, sawcutting equipment). Water filtration systems will be setup along S 200th Street. There may be night work and lighting to illuminate the work area.

Angle Lake station, guideway, and parking garage

Angle Lake Station work continues this spring and summer. We will continue installing electrical and mechanical systems, completing station tile and finish work, installing artwork, and hanging acoustical panels along the light rail guideway. We are also working on completing the approximately 1,050-space parking garage and plaza that is located next to the north station entrance (anticipated opening date: fall 2016).

South 200th Link Extension

Opening in 2016 will be quick, all-day Link service between Angle Lake Station and Sea-Tac Airport, downtown Seattle and the University of Washington.
